**Mistake in 'Neighbor-Net: An Agglomerative Method for the Construction of Phylogenetic Networks'**

In the distance reduction formulae, pg 257, the correct formulae are

$$
\begin{aligned}
d(u, a) &= (\alpha + \beta)\, d(x, a) + \gamma\, d(y, a) \\
d(v, a) &= \alpha\, d(y, a) + (\beta + \gamma)\, d(z, a) \\
d(u, v) &= \alpha\, d(x, y) + \beta\, d(x, z) + \gamma\, d(y, z).
\end{aligned}
$$

This weighting was used in current, and previous, versions of the software.
